

COATED PRODUCTS DIVISION

## **Linerless Label Products**

CPD produces linerless labelstocks that can be used for continuous labelstock in direct or thermal transfer printers that are equipped to handle "open adhesives". These linerless stocks can also be supplied with pattern coated adhesive. The adhesive is a repositionable microsphere acrylic. Proprietary release systems are used to provide both release and printability, depending on the print engine.

Converters will find utility in these labelstocks as components for "tip-on" pieces or specialized label constructions used on business forms.

### **Direct Thermal**

50# direct thermal paperstock with high sensitivity.  
Available with opaque.

### **Thermal Transfer**

50# clay coated thermal transfer paperstock. Available with opaque.

### **Ink Jet**

50# white or canary EDP paperstock.  
Available with opaque.

### **Adhesion to Stainless Steel**

0.5 - 1.0 oz/inch (20 minutes)

As with any removable/repositionable adhesive labelstock, it is the responsibility of the user to test the adhesive against the intended surface for compatibility and functionality.
