Mouse Pad and Counter Mat Overlaminates

Overlaminates

6.0 mil (0.006") rigid plasticizer free PVC clear film with a clear acrylic adhesive supplied on a 42# SCK liner. The liner is stripped and the p-s film is laminated to a printed labelstock followed by die cutting.

The overlaminates provide scratch and abrasion resistance to protect the graphic below. The film also provides good rigidity to enable easy repositioning without wrinkling and removal in time, when desired.

Adhesive Properties

CPD 1000 Permanent Clear Acrylic

Adhesion to Stainless Steel
20 - 30 ozs/inch (20 minutes)

Shear Strength
24+ hours (1.0" x 0.5", 500g)

Construction

6 mil PVC
Perm Acrylic
42# SCK Liner
