CPD Standard Materials

Films

2.6 mil White BOPP/300/42#SCK

Printable, glossy white BOPP with enhanced tack for flexible label solutions requiring repositionability or removability.

2.6 mil White BOPP/300/78#CC

Same as above with layflat liner for larger label formats such as mouse and counter mats, and signage.

2.0 mil Clear BOPP/300/42#SCK

Printable, glossy clear film for tabs, coupon construction and small-format signage.

6.0 mil Rigid PVC/1000/42#SCK

Overlaminates using a clear, embossed and plasticizer free PVC for abrasion resistance and print protection over flexible film substrates.

Papers

60# Semi-Gloss/300/42#SCK

Bright white label grade with or without opaque backside. Standard labels requiring auto-dispensing and quick stick capability.

Linerless Papers

50# Direct Thermal/200

50# EDP White or Canary/200

50# Thermal Transfer/200

Linerless label products featuring a broad range microsphere adhesive. EDP and thermal transfer constructions use a non-silicone release coating for flexo printing.

Adhesives

200

Broad range, removable microsphere for applications to smooth substrates.

300

Enhanced tack, removable microsphere for adhesion to complex surfaces.

1000

Clear, high adhesion, permanent acrylic.
